DETAILED ACTION - ALLOWANCE

1. Claims 1-16 are allowed. All claims thus being allowable, prosecution on the merits is closed in this application. A statement of the examiner's reasons for allowance is provided in the paragraph which follows below.

Reasons for Allowance

2. The primary reason for allowance of the claims is the inclusion a novel structural/functional combination in all of the claims, wherein a deformable element is used for focusing, and two moveable lens groups are used for zooming or compensating for fluctuations of an image surface. The aforesaid structural/functional combination is broadly recited in independent claim 1 (Claim 1, Lines 2-6), and more somewhat more narrowly in independent claim 11 (Claim 11, Lines 3-9). The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of applicant's independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

Other Remarks/Information

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nishioka et al. (US-6,618,209-B2; US-6,464,363-B1; US-2004/0070843-A1; US-

2004/0027684-A1), Amanai (US-2003/0179464-A1), and Mihara et al. (US-2002/0136150-A1), *inter alia*, disclose representative examples in the art to which the instant invention pertains. In particular, each of the aforesaid examples presents zoom optical systems comprising at least one deformable mirror which is used to provide the optical functionality (*e.g. focusing, zooming, compensation of image fluctuations upon zooming, etc.*) generally provided in prior art systems by moving at least one refractive lens group(s) along the optical axis thereof.

5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

6. Any other inquiry concerning this communication or earlier communications from the examiner should be directed to David N. Spector whose telephone number is (571) 272-2338. The examiner can normally be reached at this number Monday through Friday between 6:00 AM and 2:30 PM. The fax number for the organization where this application is assigned is (703) 872-9306.
